Pigmentspecification per colour:

The pigments used in our paint are indicated according to the Colour Index. The Colour Index is a system applied internationally to pigments and colouring agents used in all types of paint, thus including artists' colours. The system is based on a number and name relating to the chemical structure. The Colour Index was originally developed in the USA, which is why the descriptions of the chemical classes are given in English. The meaning of the abbreviations is as follows:

PW = pigment white	PY = pigment yellow
PO = pigment orange	PR = pigment red
PB = pigment blue	PV = pigment violet
PBk= pigment black	PBr= pigment brown
