Dear Ms. Roberts:

MSDS sheets are not required for Chartpak Dry Bond Adhesive Sheets. These products are considered "articles" as described in OSHA's standard CFR29 part 1910.1200.

An "article" is defined as "a manufactured item (1) which is formed to a specific shape or design during manufacturing; (2) which has end use functions dependent in whole or in part upon its shape or design during end use; (3) which does not release or otherwise result in exposure to a hazardous chemical under normal conditions of use."

Chartpak Dry Bond Adhesive Sheets can be used safely and successfully without fear of illness or personal injury.

Should you have further questions, please give me a call.

Sincerely,

CHARTPAK

Norman De Bastiani
Technical Director
