DICK BLICK COMPANY
Mickey Wiscons
M.S.D.S Coordinator
POB 1267
Galesburg IL

Dear Mr. Wiscons,

We do not have a Material Safety Data Sheet for
our E-Z UP CLIPS as explained below:The wax is chemically inert and non-toxic...with no
solvents. It is a micro-crystalline petroleum wax
product as basic as non-adhesive candle wax.We have never needed a chemical breakdown and have
none to give. It poses no health hazard and does
not require compliance with any known codes.The plastic used in our clip is non-toxic and has
no sharp edges.

They are utilitarian; safe.

We should add that we have been making these products
for more than 15 years--principally for schools--and
during this time no question or problem has ever arisen
as to their safety.

Sincerely yours,

Bill Taylor
